

Automatic Reception

Self-service reception – built-in furniture

A tailor-made self-service reception or built-in furniture vending machine is a modern concept of self-service check-in and check-out guests. The solution can be deployed for both partial and fully self-service operation.

It perfectly complements the interior of your hotel. It represents savings in personnel costs and a quick return on investment.

The whole solution is certified by banks, lock system manufacturers and PMS. It is equipped with industrial components to ensure smooth verification of guest identity, payments,
